Climate Change tells us , that the fulcrum of our Economic System, is WRONG – The way we are using our resources, is pushing us all towards Apocalypse. In the last 25 years of my life, one thing I have noticed that – Negative is always true whereas positive can sometimes fail. Love can be fake but War is Real. Compassion, Gratitude, Humanity and Morality are all challenged in today's times and somehow , in love of Economic Development – we all have become materialistic and not spiritual. This clearly is pushing us all towards WAR. It also tells us that we have - SURPLUS , in our economy. Which is the major cause of all problems of human beings. The root cause of SURPLUS, is that we have crossed borders for doing our business. The one and only solution is all countries become nationalists or localised business based economy and they all stop doing International Business- since this is the major cause of Surplus in economy. Unfortunately, due to human nature of poking nose into other people's matters – 2 sectors in the economy must be opened and controlled by the government – ENTERTAINMENT & TOURISM. This should be done on international scale to be done on Gold Standard – and not on USD. WHY ? Because , ever since 1971 – when this system was introduced – there have been a lot of environmental damage and this has wiped out a lot of other species from the planet. This system is highly detrimental to the health of the earth. Climate change has now asked us to stop this practice. Let us all start international trade on gold.

Also, international business is destroying the culture of a place : let us first understand the meaning of culture – As in my words – Culture of a place means the way people use the resources in their vicinity. Whichever resources you have with you – your culture becomes the same. A trade actually changes the culture due to transfer of resources and is thus, a threat to Traditional Culture. Thus, a trade barrier aids in saving the people and resource of a society / Economy / country.

The Biggest problem in International business is – Theft of Taxes by the rich and submission of income in Tax Havens. This actually puts the internal economy in danger and due to less taxes – there are 3 places that hammer the economy and create inflation :

- A. Central Bank's 14% Money Supply
- B. Deficit Financing by government
- C. Credit Creation in banking

This further increases the gap between the rich and the poor.

Surplus also brings a lot of problems with it – monopoly of big businesses , societal dysfunctions , death of humanity and other grave issues.

The moment we jump from need to want – the society and economy gets destroyed. Why ?

Because –

SURPLUS TRAVELS IN OPPOSITE DIRECTION.

Yes, this is my original research. The moment we have surplus in one sector – it will destroy the whole economy and society. Surplus is the major cause of War, Destruction, Famine, Diseases etc.

Just as in Geography, we have VILE VORTICES – Which are unexplained, where forces of nature, somehow turn opposite. The same in Science, where water expands from 0 to 4 degrees. Similarly in economics – Surplus runs in opposite direction. It cannot be explained- though it has been the same pattern from thousands of years. How is this possible – is unanswerable question. But, the truth is the exact ONE LINE of whole Economic theories ever written – Surplus runs in opposite direction.

My new Economic Theory (which I want it to become practical ASAP) – is to include Spirituality in the economic system . why ? because, spirituality saves us from Surplus. Produce and consume , only what you NEED. Nature has made us as such – so as to only survive and not disturb her other children – the rest of 8.8 million species of animals.

The concept of religion and company is the same – Work together for more and better goods for an easy life. Yet, religion teaches us not produce and consume more than required. None of the religions – whichever be , teaches to be rich to its followers – because being rich indirectly says that – you have crossed borders to do business. And will surely bring trouble for everyone.

Let us understand it with the help of history.

Margaret Mead tells us that Anthropologists study the beginning of humanity – after the Leg bone started to heal. Wild animals could not heal their wounds in legs – because a hurt animal will be eaten by their predator. But, if the leg wound is being healed – it means that somebody was with this hurt animal to help it in times of need. This marks the beginning of HUMAN in history. Help in times of need and empathy for one another – makes us human. It happened some 4.5 to 5 million years ago. We are human beings not due to the intelligence in our head – but the emotions in the heart, that what makes us humans. For the next 4 million years – it lasted stone age. After which came Bronze Age and then came Iron Age. With advancement in tools – our economy and society progressed. But , something was weird – and that was ferocious war. On a simple note – more goods means better life. Iron age is considered better than bronze age for economics. People must be happy.

But – NO. Philosophers noticed that – as we are having more goods, economies are getting stronger, War is getting more severe. Violence is rising- but peace and harmony is subsided. Thus, in 1000s of years- different parts of the world gave birth to different religions- but one thing remained the same – ESCAPE SURPLUS.

All the religions help their followers to be spiritual : it helps in a lot of ways –

- A. Relief from mental stress
- B. Hope for future
- C. Contentment
- D. Don't care about what other people think
- E. Saves from pollution
- F. Escape Surplus
- G. Economic and Social Distancing

The moment there is export / import or overproduction, everything is questioned and subjected to destruction , malice and corruption.

The one answer to todays massive corruption and money laundering in all parts of the world is SURPLUS. There is too much production. It has also gifted us a lot of mental and physical diseases. We are not made to be surplus.

Math teaches us $2+2 = 4$.

But, in Economics , $2 + 2 = 10$.

When people work together – there is rise in production. But, do not produce more than required and do stay within borders. The moment we jump outside borders, we have access to more resources. The inland economy suffers a trigger due to rise in production in one segment and thus, due to price manipulation and other reasons – economy goes haywire and all logic for morality and humanity fail.

The one reason for downfall of great empires throughout history and America in current days, is GLOBALISATION. It creates Surplus. It has destroyed moral conduct of the country – where richest 1 % hold 50 % of country's wealth.

The one reason that big tech companies and other major global companies are getting richer due to FREE TRADE AGREEMENT, and other local economies are getting affected, is because Tech is trying to solve the problems, which actually got into place due to tech itself !!!

We got TECHNOLOGICALLY ADVANCED, due to Globalisation, which in turn is the root cause of Major Economic problems. Due to this, Religion and God is challenged. Thus, violence and crime is an all time high.

In today's times, Avocado is the new FOUNTAIN OF YOUTH. Due to large scale Avocado trade, Mexican families are facing immense troubles due to Gangs and terrorists who hold majority share in Avocado Trade and market. As long as, we are in india, we must consume coconut and not avocado. It will help to lessen crimes in Mexico.

Have a heart in your chest – before doing business. Business purpose must not be to earn money. But to serve others – must be the core of business.

No business must cross borders – in order to maintain economy. Utmost important is to understand the fact, that financial institutions must not cross borders – since manipulation is very easy.

Let us closely analyse the timeline of Western Economic System. The ship of Christopher Columbus arrived in 1492 AD. The first Dutch Ships arrived in 1652 AD. The first French ships arrived in 1600 AD. Adam Smith's book – Wealth Of Nations was published in 1776 AD. Which tells us the fact that WES , is based on colonialism. How to extract resources from other people – which is 100% contradictory to Religious and Spiritual Economics – DO NOT ENTER OTHER PEOPLE'S TERRITORIES.

Also , the worst thing that the British did – was to merge the economies – and thus create SURPLUS. Surplus runs in opposite direction. WES is all about Destruction and not about construction. Today or tomorrow, all sorts of economic / social/ environmental/ physical/ mental problems will arise. The only cure to all the problems in today's world is : ECONOMIC DISTANCING.

Y.E.S.

Stay away from other people's resources and consume up until 25 kms ONLY. Stay Local and easily avoid ALL the problems of the world. ED will help to fulfil each other's needs.

Due to more merging of economies – we have ample goods and other resources. It is therefore creating other trillion problems. Only produce what you need. That's it !!!

Out of 100 – if we have have only 1 surplus – it will burn all the other 100 as well. It has to be BALANCED.

One answer is : Economic Progress along with Sprirituality.

Things related to tech and science, must be done by the government. Since , they promote Surplus and should not destroy economics – must be dealt by the government. The fact that some people are so amazing in Research and Development is because, somewhere , many people are dying due to war.

Every successful gain in Ocean Of Knowledge is due to large scale destruction or massive genocide. Only then, we can gain knowledge. I want to tell everyone – that knowledge is not free. You need BLOOD to escalate in sphere of knowledge.

America used to be great in the past. When they focused on Human Beings – that is needs of one another and economy was basically local. You lost social order due to bad economics. When your businesses became GLOBAL – and created disorder in the whole world – Result : CLIMATE CHANGE.

We are Human Beings , not from the intelligence of the head, but due to emotions in the heart. Economic Surplus destroys Humanity as well. All the problems – be at Economic/ Social/ Physical/ emotional/ mental/ political/ fake news/ war in middle east/ pollution/ rising sea level/ global warming/ tax fraud and other issues, is due to economic surplus. The one solution is Economic Distancing. We should all follow only traditional culture and consume resources within vicinity.

The recent episode of CORONAVIRUS tells us a lot of things. It points out the fact – that we are consuming more than we need. It has created a lot of imbalance. Also, our economic system is based on people, for people, by the people – only to fulfil each other's needs. Not to sell more and be rich. When there is no one to buy- all your economies and businesses fail. All your math and data fail.

The moment we became materialistic, we lost touch with spirituality and attracted tons of other problems. Though , Native American were basically Tribals- less trade , less war, less knowledge than their civilkised counterparts. Still, they knew about spirituality. They did not have any religion and thus were very much ancient people- frozen in time. Yet, they too felt something – an increment in local goods and other necessities is making them sick. Usual thinking is – increment in wealth must increase comforts. But, reality is different. Increment in wealth makes us sick. Therefore, they adopted deep spiritualism. It saves from certain / easy death.the more resource you take from earth, worse everything gets.

Conclusion . simple.

Focus on people – you will target needs,
Focus on money – you will target Wants.
The latter one serves the purpose of destruction.

Thank you for your time. You can also check my YT Video as – Fulcrum Of Economic System.
